Aspiring Software Development Engineer with hands-on experience in full-stack development using React.js, Node.js, Express.js, MongoDB, and SQL. Developed and optimized scalable web applications, RESTful APIs, and secure authentication systems. Solved 450+ LeetCode problems, completed 60+ hours of DSA training, and built multiple end-to-end projects. Proficient in C++, Java, Python, JavaScript, Docker, and Kubernetes, with a strong foundation in problem-solving, software engineering, and scalable system design.

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.3)

Punjab, India

Aug 2022 – June 2026

ShantiNiketan Jubilee School

Intermediate (Science Stream) (Percentage: 65.8%)

Motihari, Bihar

Apr 2020 – Mar 2021

EXPERIENCE & TRAINING

Board Infinity

June 2025 – July 2025

Data Structures & Algorithms Intern

Online

- Completed 60+ hours of advanced Data Structures & Algorithms training in C++, solving 100+ coding problems across arrays, linked lists, trees, recursion, and hashing
- Designed and developed a modular Library Management System using Object-Oriented Programming principles to manage 200+ books and user transactions
- Optimized data retrieval operations by 40% through hash map-based indexing for efficient book and user record management
- Implemented persistent file storage and robust file I/O mechanisms to ensure reliable record maintenance and retrieval

PROJECTS

HospCare – Healthcare Management System | *React.js, Express.js, Node.js, Mongo-DB* Mar 2026 – May 2026

- Developed a full-stack healthcare management application using React.js, Node.js, Express.js, and MongoDB to streamline patient appointment scheduling and record management
- Established secure user authentication and authorization using JWT and password hashing mechanisms to protect patient and healthcare data
- Architected and integrated RESTful APIs for appointment booking, patient management, and doctor scheduling with efficient CRUD functionality
- Enhanced MongoDB database operations and query performance to manage large volumes of patient records with improved reliability and response efficiency

Quick.AI – AI SaaS Platform | *PostgreSQL, Express.js, React, Node.js, (Clerk, Neon)* Feb 2026 – Mar 2026

- Engineered an AI-powered web platform with secure user authentication and authorization using Clerk, integrated with Neon PostgreSQL for persistent data management
- Orchestrated backend workflows using Llama-3.1 (Groq API), Mistral-7B (OpenRouter), and pdf-parse to support AI-driven content generation and document processing
- Incorporated AI-driven features including image generation, background and object removal, and content generation through Clipdrop and Cloudinary API integrations
- Crafted a responsive React and TailwindCSS interface featuring a creator dashboard, community feed, content interactions, and containerized deployment using Docker Compose and Kubernetes

TECHNICAL SKILLS

Languages: C++, Java, Python, SQL, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub, Docker, Kubernetes, Linux, VS Code, IntelliJ IDEA, Jupyter Notebook

Libraries/Frameworks: React.js, NumPy, Pandas, Matplotlib

ACHIEVEMENTS

LeetCode (450+ Problems Solved)

Jun 2025

- Solved 450+ algorithmic problems across arrays, linked lists, trees, graphs, and dynamic programming with 200+ active days, demonstrating strong problem-solving and data structures expertise.

HackerRank

Nov 2024

- Achieved 5-star ratings in C++, Python, and SQL, demonstrating proficiency in programming, database querying, and algorithmic problem solving.
